Springer eBooks in Physics and Astronomy

The Springer Physics and Astronomy program serves research and academic communities around the globe, covering the full spectrum including nuclear physics, condensed matter, optics and lasers, theoretical and applied physics, astrophysics and space science.

Springer offers the biggest collection of eBooks in the field, many of which are written and edited by Nobel Laureates. Springer journals are recognized as a source for high-quality content offering cutting-edge research, topical reviews and rapid communications.

All journals are peer-reviewed and edited by internationally respected experts from leading institutions. Most journals are indexed by major abstracting services. Articles are searchable by subject, publication title, topic, author or keywords on SpringerLink, the world's most comprehensive online platform for scientific content.
