**Theory, Research, and Practical Guidelines for Family Life Coaching**

This volume focuses on breaking ground with family coaching, presenting theory, research and practical guidelines for researchers, educators and practitioners. Readers will discover a theoretical overview of coaching psychology and family science, accessibly presented research and models of family coaching and family life education. The insight this book provides into family systems and practical information on coaching families will be valuable to youth coaches, parent coaches, life coaches and counsellors, amongst others. Beginning with a brief introduction on the necessity of this volume and further research on family coaching in general, the author takes readers progressively...[...]

**Enhancing Behavioral Health in Latino Populations**

**Reducing Disparities Through Integrated Behavioral and Primary Care**

This timely volume examines the potential of integrated care in providing effective, accessible behavioral healthcare for Latino clients. The integrated care model is discussed in practical terms, with guidelines for the addressing the needs of Latinos in a coordinated, patient-focused setting. Specific points of attention include common behavioral and medical/mental health conditions (e.g., depression, chronic pain, tobacco use), special considerations in working with Puerto Rican and Cuban clients, and recommendations for working with children. These important issues are considered against the backdrop of opportunities and challenges inherent in integrated care and its[...]

**The Changing Dynamics of Bisexual Men’s Lives**

**Social Research Perspectives**

This important book provides unique new knowledge on the lived experience of openly bisexual men without medicalizing or pathologizing them. Presenting research from sexology, sociology, and psychology, it features extensive findings on the sexual, social, romantic, and emotional behaviors of the 90 men interviewed in the U.S. and U.K. Issues and challenges are examined in such areas as identity and self-concept, along with the burden of social erasure and the paradox of stigma from both the gay and straight communities. However, the research reveals evidence of a recent cultural transition toward acceptance of bisexual identity and behavior, with younger bisexual men experiencing[...]

**Origins and Originality in Family Therapy and Systemic Practice**

The founding volume of the European Family Therapy Association book series presents new ideas confirming the crucial importance of systemic family therapy for family practice. Spanning paradigms, models, concepts, applications, and implications for families as they develop, experts in the field demonstrate the translatability of session insights into real-world contexts, bolstering therapeutic gains outside the treatment setting. Chapters emphasize the potential for systemic family therapy as integrative across theories, healing disciplines, modes of treatment, while contributors’ personal perspectives provide unique takes on the therapist’s role. Together, these papers promote best[...]

**Mentoring from a Positive Psychology Perspective**

**Learning for Mentors and Mentees**

This book examines the concept and practice of mentoring, as well as the wider scope and diversity of the mentoring that people can experience in their own life time. With each chapter dedicated to a specific level of mentoring, the book makes clear the impact and value of mentoring not only for the participants themselves but also on the situations in which mentoring occurs and the reverberations, positive and negative, on others outside this relationship. It shows the importance of relationships for people, individually and collectively and clarifies how relationships form the DNA
for an inspiring, creative and professional life for the person and the community in which they engage.[…]

Key Insights into Basic Mechanisms of Mental Activity

A more nuanced perspective on cognition, behavior, personality, and pathology. Mind/brain. It is explained that mental activity is not possible without concepts/memory structures that exist in the brain and result from perceptual learning. Core mental activities including thinking, reasoning, and judgment are described as components of self-regulation and in terms of interacting neural systems. This framework also leads to a more specific and less stigmatizing system for classifying and diagnosing mental illnesses. This concise volume: Introduces the S-O-R (stimulus-organism-response) model of mental activity. Recasts mental processes as neuro-mental processes. […]

Emotional Prosody Processing for Non-Native English Speakers
Towards An Integrative Emotion Paradigm

This volume provides the first systematic and data-driven exploration of English emotional prosody processing in the minds of non-native speakers of the language. Over the past few decades emotional prosody has attracted the interest of researchers from a variety of disciplines such as psychiatry, neuropsychology, psycholinguistics, and linguistics. Although a considerable collective body of empirical evidence exists regarding emotional prosody processing in native speakers of various languages, non-native speakers have been virtually ignored. This constitutes a knowledge gap of increasing relevance, as we approach 2050, the year when the global population of non-native speakers of [...] More on www.springer.com/978-3-319-44041-5

Problem Gambling in Hong Kong and Macao
Etiology, Prevalence and Treatment

This book critically examines the psychology of gambling in Hong Kong and Macao. Covering the history of gambling and its development in the two jurisdictions, it highlights the prevalence and status quo of problem gambling, the theoretical perspectives on the etiology of gambling disorder, and the treatment of problem gambling. The book also introduces a personality and pathways development model of Chinese problem gamblers and concludes with outlooks on the future of gambling in Hong Kong and Macao.

Resilience Training for Firefighters
An Approach to Prevent Behavioral Health Problems

Developing resilience skills has the potential to shield firefighters and other emergency responders from the negative effects of stressful incidents and situations. Drawing on cutting-edge research, this SpringerBrief proposes strategies to prevent firefighter behavioral health issues using the proactive approach of resilience training. Further, resilience training aims to develop mental toughness and support overall well-being in all facets of the responder’s life. This book emphasizes lessons and research from Positive Psychology. A new branch in the science of how the mind operates, Positive Psychology focuses on developing emotional wellness and preventing behavioral health [...] More on www.springer.com/978-3-319-38778-9

Family Therapy in Global Humanitarian Contexts
Voices and Issues from the Field

This book brings together a diverse set of clinicians, scholars, and researchers actively using systemic family therapy ideas within the context of ongoing or recent humanitarian intervention. The contributions focus on critical issues specific to the practice of family therapy within global mental health contexts, with a particular attention to the humanitarian sphere. Issues covered include treatment across cultures and language barriers, work in settings with covert and overt threats, practice in low-resource situations, and the creation of a family therapy program that relates to peace-building, reconciliation, and post-war discourse. The diverse group of authors contributes […] More on www.springer.com/978-3-319-39269-1

**Poststructural and Narrative Thinking in Family Therapy**

This brief applies variations in poststructural and practice to the field of family therapy. Poststructural thinking pervades the world of therapeutic practice in ways that are often invisible to both the theoretician as well as the practitioner. In this brief, the authors focus on what poststructuralism has brought to our understanding. What follows are chapters that speak to training and teaching principles as well as to practices that draw on ideas about “becoming,” “relationality,” and the aesthetics of engagement. Each chapter builds on the other with the last one reprising a key component of narrative understanding. From a teaching institution in Auckland, NZ to an[...]

**Grandparents of Children with Disabilities**

**Theoretical Perspectives of Intergenerational Relationships**

This brief offers a wide view of the journey of grandparents of children with disabilities by employing a wide range of theoretical theories such as positive psychology, intergenerational relationships, psychoanalytic views and models of stress. It presents a multidimensional view of grandparents, which begins with the general role of grandparents in the family and the transition to grandparenthood, as a major life event. The brief moves on to discuss grandparents’ roles under unique circumstances such as illness or disability in the family and then deals with perspectives of parents of children with disabilities on the involvement of grandparents. Finally, it presents a review of[...]

**Ronald J. Fisher: A North American Pioneer in Interactive Conflict Resolution**

This edited volume presents selected papers focusing on Ronald Fisher’s cumulative contributions to understanding destructive intergroup conflicts from a social-psychological perspective, and to the development and assessment of small group, interactive methods for resolving them. Highlights include schematic models of third party consultations, intergroup conflicts, and a contingency approach to third party intervention. Overall, the selected texts offer a comprehensive description and clear rationale for interactive conflict resolution and its unique contributions to peacemaking.

**Granulocytes of Cancer Survivors: A Biopsychosocial Approach**

This competence-building resource synthesizes a rich trove of conceptual and practical information on treating cancer survivors at risk of being underserved. Spotlighting a diverse group of ethnic and other demographic populations surviving diverse forms of cancer, the book models the assessing of needs and the developing of strategies to meet them. The multiple burden of cancer—medical and psychosocial problems, discrimination and stigma, quality of life issues—is described in depth as it affects different cultural and age populations. Contributors also present interventions that effectively and meaningfully address these complex intersections of physical, emotional, interpersonal,[...]

**Psychology of Perception**

This book defines the terminology used in the fields of sensation and perception and describes the biological and physical bases required for understanding sensory experiences. It offers more specifically an introduction to the study of psychophysics, auditory perception, visual perception, and attention, and discusses the basic concepts and mechanisms used to interpret different perceptual phenomena. Featured topics in this book: Laws of psychophysics, including the discrimination law of Weber and Stevens’ power law. Psychophysical methods and signal detection theory. Hearing music and speech. Color, form and depth perception. The role of attention in perception. Sensory[...]

**Empathy in Health Professions Education and Patient Care**

This welcome updated and expanded edition offers new findings and insights into this cornerstone of practice as well as effective tools for its clinical use. Spanning psychodynamic theory to neuroscience and evolution to medicine, the book defines empathy in the context of patient care, and both in its critical role as a human attribute and in its necessity in promoting change and healing. Theory and data link practitioner empathy with patients’ positive outcomes in areas
such as provider trust, treatment adherence, clinical improvements, and quality of life. Author also provide convincing evidence in support of validity and reliability of the Jefferson Scale of Empathy for measuring[...]

In this book, the first in a series of collected works, traces the evolution of Problem Behavior Theory from its inception to its current status as a widely used framework for understanding and addressing risky behavior in youth and young adults. The theory is explored from its beginnings as a study of deviant behavior and alcohol abuse in a tri-ethnic community through its expansion to include psychosocial aspects of development, risk and protective factors, and health behavior in the larger societal context of youth behavior. In its current form, Problem Behavior Theory constitutes an interdisciplinary approach to research personal and societal factors that are involved in both[...]

This textbook provides a comprehensive introduction into the areas of human action planning and action control. It discusses the basic theoretical issues and questions in understanding the planning and control of human goal-directed action. The authors begin by presenting an integrative theoretical framework and the neurobiological foundations of action planning and execution. Subsequent chapters discuss how goals are represented and how they guide action control; how perception and action interact; how simple and complex actions are selected and planned; how multitasking works; and how actions are monitored. Topics of interest include: stimulus-triggered selections, rule-based[...]

Large-Scale Brain Systems and Neuropsychological Testing
An Effort to Move Forward

This leading-edge volume offers a new framework for neuropsychological testing rooted in the current evidence base on large-scale brain system interactions. Expert coverage brings traditional discrete areas of cognitive functioning (e.g., attention, memory) in line with highly nuanced relationships between cortical and subcortical processing. The new findings point to more accurate and targeted testing, as authors expand on the judicious addition of nonstandardized methods to core diagnostic tools and the underused capacity of neuropsychological testing to assess social behavior and personality. The book’s emphasis on cognition in context gives practitioners better understanding of[...]

Infant Brain Development
Formation of the Mind and the Emergence of Consciousness

This book discusses the main milestones of early brain development, from formation of the neural tube to the connection of the nerves in the adolescent, with a particular focus on the preterm infant. It reviews the genetics of brain construction and neural development to identify critical periods for brain organization in utero and analyses the processes of birth to pinpoint early moments of consciousness. Coverage provides intriguing examples of brain and mind development in very early premature infants, comparing and contrasting the emergence of consciousness within and outside the mother’s environment. These insights offer new perspectives on issues concerning fetal pain, awareness[...]

Social Media in Employee Selection and Recruitment
Theory, Practice, and Current Challenges

This timely resource offers fresh research on companies’ use of social media platforms—from Twitter and Facebook to LinkedIn and other career sites—to find and hire personnel. Its balanced approach explains why and how social media are commonly used in both employee recruitment and selection, exploring relevant theoretical constructs and practical considerations about their appropriateness and validity. Contributors clarify a confusing cyberscape with
recommendations and best practices, legal and ethical issues, pitfalls and problems, and possibilities for standardization. And the book’s insights on emerging and anticipated developments will keep the reader abreast of the field as it[...]

Career Paths in Telemental Health

This visionary volume spotlights innovative mental health careers in today’s technology-driven climate while inspiring readers to create their own opportunities. Unique and engaging perspectives from professionals across disciplines and job titles describe the thought processes, ingenuity, and discipline behind matching technologies to the needs of specific populations and settings. These non-traditional paths show digital advances as used in frontline, complementary, supplemental, and alternative interventions, in academic and training settings, in private practice, and in systems facing transition. The diversity of these contributions illustrates the myriad openings[...]

Resources for Teaching Mindfulness

This master-class-in-a-book is designed to guide teachers of mindfulness-based interventions (MBI) in continuing to develop more competence while raising global standards of practice and pedagogy. Starting with the central yet elusive concept of stewardship, it then expands upon the core components of MBI pedagogy. A series of reflective essays by MBI teachers from around the world foregrounds differences and challenges in meeting participants “where they are." Such reflections are both inspiring and thought-provoking for teachers — wherever they are. The book also provides practical guidance and tools for adjusting teaching style and content for special populations, from chronic pain[...]

Humor in Infants
Developmental and Psychological Perspectives

This volume explores in depth how infants—perhaps as young as three months—develop the capacity to appreciate, participate in, and create humor. Engagingly written, it synthesizes theories of humor, its subtle complexities, and why it exists despite seeming to have little survival value. Chapters trace the developing skills in the child’s interactions with parents and others, the roles of verbal and nonverbal behaviors in humor, and related phenomena including absurdity, funniness, laughter, teasing, and play. These diverse perspectives offer rich insights into how the human mind learns from its environment, why humor is funny, and what humor can tell us about being human. This[...]

Medical and Mental Health During Childhood
Psychosocial Perspectives and Positive Outcomes

This textbook provides a comprehensive overview of medical and mental illness in children, detailing how psychological, academic, and social functioning can be enhanced – and inherent challenges overcome – in young patients. The volume describes best-practices in depth, including how to ensure accurate diagnosis, developmentally appropriate treatment, and effective coordination between medical and school personnel. It discusses common medical conditions (e.g., asthma, cancer, diabetes) and mental health conditions (e.g., autism, ADHD, depression), emphasizing the critical role of health education in promoting optimal outcomes. Topics featured in this text include: Screening and[...]

Runaway and Homeless Youth
New Research and Clinical Perspectives

This straightforward reference surveys the knowledge base on homeless, runaway, and thrown-away children and adolescents and makes concrete recom-
Quality Improvement in Behavioral Health

This innovative volume presents a cogent case for quality improvement (QI) in behavioral healthcare as ethical practice, solid science, and good business. Divided between foundational concepts, key QI tools and methods, and emerging applications, it offers guidelines for raising care standards while addressing ongoing issues of treatment validity, staffing and training, costs and funding, and integration with medical systems. Expert contributors review the implications and potential of QI in diverse areas such as treatment of entrenched mental disorders, in correctional facilities, and within the professional context of the American Psychological Association. The insights, examples, [...]

Pediatric Neurotoxicology
Academic and Psychosocial Outcomes

This book focuses on children and the impact of neurotoxins on the developing brain to guide the practice of psychologists working with children in clinical and school settings. Each chapter covers a distinct neurotoxin or group of neurotoxins, with particular emphasis on the impact of the neurotoxin exposure on the developing brain and long-term cognitive and psychosocial outcomes. This is more complex than studying neurotoxins with adults because of the rapid development occurring in the child’s brain. Further, children are more susceptible than adults to the effects of neurotoxins due to their developmental status. Many of the effects discussed in this volume occur in utero, thus [...]

Reading Rehabilitation for Individuals with Low Vision

Research and Practice in the Czech Republic

This book presents an emerging rehabilitation program for improving the reading abilities of individuals with low vision who undergo therapy for visual impairment. Its interdisciplinary framework for visual training through reading skills development aligns its goals with those of special education programs and features anatomical and psychological background chapters, diverse perspectives on rehabilitation, and empirical supporting data. Program details span theoretical bases, strategies and planning, pedagogical considerations, use of assistive technologies, and assessment of client progress and program efficacy. And by locating rehabilitation in the psychosocial experience of [...]

Mass and Serial Murder in America

This timely reference examines the psychological and social phenomena of mass and serial murder, bringing scholarly depth to a frequently sensationalized subject. Its review of the literature features case studies of serial and mass murderers to expand on salient theories of evil, with biopsychosocial profiles highlighting core personality traits, particularly malignant narcissism, associated with psychopathy and its often deadly outcomes. The author’s insightful analysis separates misconceptions from reality, poses questions for critical thinking and discussion, and offers realistic sug-
gestions for prevention. Public fascination with these violent figures—the mystique of serial[...]

Measures of Positive Psychology
Development and Validation
The book contributes to the vast field of research in psychometrics as well as to the growing field of positive psychology. It analyses the development and validation of several constructs of positive psychology like resilience, flow, mindfulness, spirituality, and intrapersonal and interpersonal strengths. The chapters discuss the test construction process and development scales for constructs that are validated on the Indian population. In most Indian behavioral research, psychological tests from the West are employed without assessing psychometric properties in India. However, establishing validation of psychological tests in a new culture is necessary in order to claim results based[...]

Development and Coping
Stress, Neurophysiology, Social Relationships, and Resilience During Childhood and Adolescence
This book traces the development of coping from birth to emerging adulthood by building a concep-
tual and empirical bridge between coping and the development of regulation and resilience. It offers a comprehensive overview of the challenges facing the developmental study of coping, including the history of the concept, critiques of current coping theories and research, and reviews of age differences and changes in coping during childhood and adolescence. It integrates multiple strands of cutting-edge theory and research, including work on the development of stress neurophysiology, attachment, emotion regulation, and executive functions. In addition, chapters track how coping develops,[...]

Well-Being, Positive Peer Relations and Bullying in School Settings
This book focuses on well-being at school in association with positive peer relationships and bullying. Taking an integrative and community-based approach, the book outlines the significance of student–school relationships for well-being and emphasizes the importance of school and classroom climate for promoting well-being. Embedded in research and theory, the book reflects the belief that all of our dealings with children and young people in whatever role, whether as parent or teacher or in some other capacity, are bounded by theory, either implicit or explicit. The book highlights the role of partnerships and linkages in addressing school-based well-being and anti-bullying programs.[...]

Developmental Disabilities
Pica in Individuals with Intellectual Disabilities
This book provides a comprehensive overview of the clinical phenomenon of pica. It focuses specifically on the disorder as it presents in children, adolescents, and adults with autism spectrum disorder (ASD) and intellectual disabilities (ID). Initial chapters introduce current theories and definitions, followed by a more detailed examination of how developmental disabilities complicate diagnosis and intervention. The volume describes evidence-based and clinically sound approaches to the treatment and prevention of pica in school and adult clinical settings, ranging from behavioral treatment to function-based interventions.
In addition, it discusses common diagnostic, client, and [...]More on www.springer.com/978-3-319-30796-1

Developing Leadership and Employee Health Through the Arts
Improving Leader-Employee Relationships
This book examines the problems that a “laissez faire” attitude from managers can create in the workplace, as well as the ensuing illness such problems may cause among employees. The book offers new ideas for dealing with these problems and proposes the use of cultural experiences as an active component in leadership development programmes for managers. It presents the findings from a randomized trial to show how cultural experiences can be deployed, and what the effect on employees is. The book discusses health-promoting leadership and key components in cultural activities for the benefit of workplaces from several points of view, offering a historical, social, psychological,[...]

Juvenile Delinquency and Disability
This book discusses the relationship between juvenile disability and delinquency, including characteristics of youth with disabilities, how disability relates to delinquency, and its impact during a youth’s involvement with the juvenile justice system. The book details the relationship between developmental, cognitive, psychological, and educational disorders—specific conditions including ADHD, bipolar disorder, and autism spectrum disorder—and delinquency in light of both their overrepresentation among youth offenders and the uninformed handling of these youth within the court system. Case studies illustrate the complexities in the processing and placement of these youth offenders,[...]

W. Tucker
Narratives of Recovery from Serious Mental Illness
In this informative and inspiring book the author narrates the stories of 12 patients whom he treated during their recovery from serious mental illness. These narratives reveal their common struggles: misdiagnosis, dual-diagnosis, impeded access to medication, medication-adherence issues, homelessness, employment/unemployment issues, and problems with governmental agencies. They also reveal some of the satisfactions of practicing outreach psychiatry: appreciating the patients’ resilience, persistence, and talents, and the cooperation of outside service-providers, all of which promote recovery. Each patient’s path is unique. Their successes remind us that schizophrenia, paranoia,[...]

T. Wasserman, L.D. Wasserman

Depathologizing Psychopathology
The Neuroscience of Mental Illness and Its Treatment
This brief, accessible treatise harnesses the neurophysiological processes of learning to create an innovative and powerful approach to therapy. It sets out a non-pathologizing alternative not only to the current medicalized conception of diagnosis and treatment but also to the labeling of relatively normal reactions to stressors and upsets as illnesses. Rooted in the neurobiology of human learning, the book’s approach to treatment, Neuro-Cognitive Learning Therapy, characterizes maladaptive behavior patterns as learned responses to upsetting conditions—processes which can be unlearned. In addition, the coverage includes a clinical teaching guide for bringing NCLT theory and methods[...]

J.J. Xiao (Ed.)

Handbook of Consumer Finance Research
This second edition of the authoritative resource summarizes the state of consumer finance research across disciplines for expert findings on—and strategies for enhancing—consumers’ economic health. New and revised chapters offer current research insights into familiar concepts (retirement saving, bankruptcy, marriage and finance) as well as the latest findings in emerging areas, including healthcare costs, online shopping, financial therapy, and the neuroscience behind buyer behavior. The expanded coverage also reviews economic challenges of diverse populations such as ethnic groups, youth, older adults, and entre-
preneurs, reflecting the ubiquity of monetary issues and concerns. [...]
