**Scientific Process and Social Issues in Biology Education**

This book complements fact-drive textbooks in introductory biology courses, or courses in biology and society, by focusing on several important points: (1) Biology as a process of doing science, emphasizing how we know what we know. (2) It stresses the role of science as a social as well as intellectual process, one that is always embedded in its time and place in history. In dealing with the issue of science as a process, the book introduces students to the elements of inductive and deductive logic, hypothesis formulation and testing, the design of experiments and the interpretation of data. An appendix presents the basics of statistical analysis for students with no background in[...]

**Postformal Education**

*A Philosophy for Complex Futures*

This book explains why the current education model, which was developed in the 19th century to meet the needs of industrial expansion, is obsolete. It points to the need for a new approach to education designed to prepare young people for global uncertainty, accelerating change and unprecedented complexity. The book offers a new educational philosophy to awaken the creative, big-picture and long-term thinking that will help equip students to face tomorrow's challenges. Inside, readers will find a dialogue between adult developmental psychology research on higher stages of reasoning and today's most evolved education research and practice. This dialogue reveals surprising links between[...]

**Women's Voices in the Field of Educational Technology**

*Our Journeys*

In a professional world that has a tradition of the "good old boy" network, women long have fought for recognition in the educational technology field. In this book authors discuss the women in their own lives who have made the difference for them in their professional development. A group of 31 individuals from the USA, Canada, Northern Cyprus, the UK, and South Korea were asked to be part of this endeavor. The breadth of the list was intended to bring together as many perspectives as possible. Some stories included in this book are deeply private, others offer historical perspectives of women's roles in educational technology, while others focus on mentoring. This book is intended[...]

**Elementary Mathematics from a Higher Standpoint**

*Volume I: Arithmetic, Algebra, Analysis*

These three volumes constitute the first complete English translation of Felix Klein's seminal series "Elementarmathematik vom höheren Standpunkte aus". "Complete" has a twofold meaning here: First, there now exists a translation of volume III into English, while until today the only translation had been into Chinese. Second, the English versions of volume I and II had omitted several, even extended parts of the original, while we now present a complete revised translation into modern English. The volumes, first published between 1902 and 1908, are lecture notes of courses that Klein offered to future mathematicians, realizing a new form of teacher training that remained valid[...]

Teaching Shakespeare to ESL Students
The Study of Language Arts in Four Major Plays

This is a teacher’s resource book tailor-made for EFL teachers who want to bring Shakespeare into their classes. It includes forty innovative lesson plans with ready-to-use worksheets, hands-on games and student-oriented activities that help EFL learners achieve higher levels of English proficiency and cultural sensitivity. By introducing the plots, characters, and language arts employed in Macbeth, Romeo and Juliet, The Taming of the Shrew, and The Merchant of Venice, the book conveys English grammatical rules and aspects like a walk in the garden; complicated rhetorical features such as stress, meter, rhyme, homonymy, irony, simile, metaphor, euphemism, parallelism, unusual word...

Language Across the Curriculum & CLIL in English as an Additional Language (EAL) Contexts
Theory and Practice

This book will be of interest to a broad readership, regardless of whether they have a background in sociolinguistics, functional linguistics or genre theories. It presents an accessible “meta-language” (i.e. a language for talking about language) that is workable and usable for teachers and researchers from both language and content backgrounds, thus facilitating collaboration across content and language subject panels. Chapters 1 to 3 lay the theoretical foundation of this common meta-language by critically reviewing, systematically presenting and integrating key theoretical resources for teachers and researchers in this field. In turn, Chapters 4 to 7 focus on issues in pedagogy[...]

Writing for Publication
Transitions and Tools that Support Scholars’ Success

This book offers systematic instruction and evidence-based guidance to academic authors. It demystifies scholarly writing and helps build both confidence and skill in aspiring and experienced authors. The first part of the book focuses on the author’s role, writing’s risks and rewards, practical strategies for improving writing, and ethical issues. Part Two focuses on the most common writing tasks: conference proposals, practical articles, research articles, and books. Each chapter is replete with specific examples, templates to generate a first draft, and checklists or rubrics for self-evaluation. The final section of the book counsels graduate students and professors on selecting[...]

Competencies in Sleep Medicine
An Assessment Guide

Competencies in Sleep Medicine provides the knowledge and curriculum needed for a Sleep Medicine Training Program. The approach is consistent with the goals of the Accreditation Council for Graduate Medical Education (ACGME), which asks programs to develop specific and targeted approaches to each program that covers the material presented in the Training Program. Authored by leaders in the field, each chapter focuses on an area of knowledge and skills in sleep medicine and offers appropriate examples of instruction and assessment. These principles and protocols for training can be used by a program to address weaknesses, assess trainees in a standardized fashion, and provide[...]

Teaching English Reading in the Chinese-Speaking World
Building Strategies Across Scripts

This book investigates inherent, structural differences in the Chinese and English writing systems which predispose learners from childhood to develop specific literacy-learning strategies, which can impair later efforts at learning foreign language literacy if the foreign language script varies significantly from the native language script. It compares educational practices and philosophies in Chinese and English-speaking classrooms, and examines the psychological underpinnings of these literacy learning strategies. This book presents psychometric testing of adult reading strategy defaults and examines case study data, revealing that Chinese students are susceptible to misapplying[...]

Critical Literacies
Global and Multicultural Perspectives

This book offers comprehensive coverage of critical literacies by pursuing a balanced approach to theory, research, and practice. By clarifying the gaps among the frameworks of critical literacies, the author discusses new ways of approaching them from global and multicultural perspectives and provides an instructional model of critical global literacies that draws on her own experience and an extensive literature review. This insightful book also documents teachers’ case studies, focusing on their voices and instructional approaches in diverse classrooms. The author critically analyses the case studies and offers important suggestions for future research and practice.

English for Academic Research: A Guide for Teachers

Scientific English is possibly the most rewarding area of EFL teaching. It differs from English for Academic Purposes (EAP) as it is directed to a much smaller audience: PhD and postdoc students. Courses on Scientific English are held in universities throughout the world, yet there is very little support for teachers in understanding what to teach and how to teach it. This guide is part of the English for Academic Research series. Part 1 of the book sheds light on the world of academia, the writing of research papers, and the role of journal editors and reviewers. Part 2 gives practical suggestions on how to help your students improve their presentation skills. In Part 3 you will learn[...]
