Y. El Miedany (Ed.)

Patient Reported Outcome Measures in Rheumatic Diseases

This book discusses the role of patient reported outcome measures (PROMs) in the diagnosis and management of rheumatic diseases and their implementation in patient-centered care. It aims to improve the quality and efficiency of patient care in standard practice by outlining the appropriate information-gathering and decision-making processes. The book highlights the evidence and advanced knowledge base of PROMs in rheumatic diseases such as rheumatoid arthritis, systemic lupus erythematosus, juvenile idiopathic arthritis, osteoarthritis, and systemic sclerosis. Featuring reviews of Patient Reported Outcome tools and Physician RheuMetric Measures as well as examples of patient reported...

G. Hughes

Hughes Syndrome
A Patient's Guide

This second edition is a result from a worldwide surge of interest in antiphospholipid syndrome. This disease, also known as Hughes Syndrome, affects all organs of the body including the placenta, and therefore touches all areas of medicine. Many publications have shown that APS causes miscarriage, strokes, heart attacks and teenage epilepsy. This new edition will see many of the illustrations updated as well as an increase in the number of figures within the chapters, to help the reader understand and treat this disease. It aims to help patients with Hughes Syndrome and...

R.M. Laxer, D.D. Sherry, P.J. Hashkes

Pediatric Rheumatology in Clinical Practice

This second edition is primarily for trainees and junior pediatric residents in adult rheumatology who will be seeing pediatric patients with rheumatic diseases. The short chapters have clear tables and many clinical photos to demonstrate key features of diseases and allow the reader to be well informed when seeing patients with rheumatic diseases. This book also allows the readers to develop and approach the field and develop differential diagnoses.

D. Roccatello, L. Emmi (Eds.)

Connective Tissue Disease
A Comprehensive Guide - Volume 1

In this volume devoted to systemic lupus erythematosus (SLE) and Sjögren syndrome, leading specialists from different disciplines present the latest research findings on many aspects of the diseases and describe the most recent trends in treatment, such as the “treat to target” approach. Both basic science and clinical medicine are addressed, with emphasis on the most promising clinical and laboratory-based studies. The coverage is comprehensive in scope, encompassing, for example, epidemiology, pathogenesis, autoantibodies and biomarkers, disease manifestations, involvement of different organs or systems, relationships with other disorders, biological therapy of SLE, and systemic...
