Safe at Home with Assistive Technology

This book describes how assistive technology can help handicapped, elderly and acutely sick people to manage their daily lives better and stay safe in the home. It discusses how safety is understood from an ethical, technical and social perspective, and offers examples of the problems that users, their helpers and professional carers have with assistive technology in everyday situations. The book provides insights from user-centred research and uses photographs to illustrate the main topic: how users and technology can work together to ensure safety. User-focused and combining experience with research, the book will interest users of these kinds of technology, health professionals who,...

Passing the Certified Bariatric Nurses Exam

The Certified Bariatric Nurse (CBN) designation was created by the American Society for Metabolic and Bariatric Surgery to fill the rapidly growing need for nurses specialized in the care of patients undergoing weight loss surgery. This book approaches this subject area to assist nurses interested in passing the CBN exam. It can also be used as a general resource for those interested in a comprehensive but concise review of the rapidly growing field of Bariatric Surgery. This would include medical students, residents, dietitians, and other allied health professionals. Dr. Marc Neff is a recognized expert in the field of Bariatric Surgery. In his current position, his hospital is...

Introduction to Advanced Nursing Practice
An International Focus

Prepared under the auspices of the International Council of Nurses (ICN), this first volume provides a comprehensive overview of the rapidly emerging field of advanced nursing practice. It addresses central issues in the role and practice development that are fundamental to defining and differentiating the nature of this field. Topics include defining the role, role characteristics, scope of practice, education, regulation and research. Obstacles to and facilitators of that role are addressed and include ethical questions arising in the context of practice development. With an international focus, this volume examines international developments in the field, as reflected in[...]

Strategic Planning for Advanced Nursing Practice

This eagerly anticipated book equips readers to understand the dynamics of policy processes, relevant decision-making and the significance of key decision-makers. It also emphasizes the usefulness of negotiation and diplomacy skills in order to support the development of an advanced nursing practice (ANP) initiative that involves the identification of pivotal issues to ensure that nurses unlock their full potential. Topics include a definition of strategic planning, essential factors to bear in mind, and frameworks to use in the context of formulating effective policies. By addressing outcome indicators and research, this volume offers a comprehensive approach to coordinated planning.

Key Concepts and Issues in Nursing Ethics

Short case studies, based on real stories from the health care arena, ensure that each chapter of this book is rooted in descriptions of nursing practice that are grounded, salient narratives of nursing care. The reader is assisted to explore the ethical dimension of nursing practice: what it is and how it can be portrayed, discussed, and analysed within a variety of practice and theoretical contexts. One of the unique contributions of this book is to consider nursing not only in the context of the individual nurse – patient relationship but also as a social good that is of necessity limited, due to the ultimate limits on the nursing and health care resource. This book will help the

Dementia in Nursing Homes

Written by leading international experts, this book discusses the latest advances in the field of dementia in nursing homes. The topics and findings covered are based on their survey and on a scientific literature review. Dementia is spreading worldwide, placing a growing burden on healthcare systems and caregivers, as well as those affected. With increasing and complex care needs, nursing home admission is often necessary. Globally, over half of nursing home residents suffer from dementia. The book provides essential information on the most important issues in dementia in nursing homes today, including meaningful activi-
