Antioxidants in Andrology

This book focuses on the use of various molecules with antioxidant properties in the treatment of major male genital tract disorders, especially male infertility, erectile dysfunction, and accessory gland infection. The coverage also includes discussion of pathophysiology, the molecular basis of male infertility, and the rationale for use of antioxidants, with particular attention to coenzyme Q10 and carnitine. Oxidative stress occurs when the production of reactive oxygen species, including free radicals, exceeds the body’s natural antioxidant defences, leading to cellular damage. Oxidative stress is present in about half of all infertile men, and reactive oxygen species can produce[...] More on www.springer.com/978-3-319-41747-9

Underactive Bladder

The field of underactive bladder is a poorly recognised yet important clinical condition, affecting up to a third of patients over 65. In this book, the authors look at the field of underactive bladder and its presentations, clinical diagnosis, potential etiopathogenesis and treatment. While the editors address a great deal of background information, they clearly identify that many limitations still exist to clinical diagnosis and urodynamics evaluation, and in particular a dearth of appropriate treatment options. This complex condition needs to be recognized and identified in the routine evaluation and clinical management of patients. More on www.springer.com/978-3-319-43085-0

Interpretation of Basic and Advanced Urodynamics

This book provides a comprehensive, state-of-the-art review of this evaluation of voiding disorders and will serve as a valuable resource for clinicians and surgeons. The book reviews the basic indications for urodynamics as well as the interpretation of basic and advanced studies with the use of clinical vignettes. In addition to step-by-step description in text, the textbook provides illustrations/photographs and tracings of different urodynamics scenarios. This atlas of urodynamics will serve as an extremely useful resource for physicians dealing with and interested in the evaluation of pelvic floor disorders and voiding dysfunction. It will provide a concise and comprehensive [...] More on www.springer.com/978-3-319-43245-8

Urinary Diversion

This book offers a detailed description of various forms of urinary diversions, including the ideal conduit, orthotopic neobladder, and a variety of continent cutaneous diversions with specific focus on the techniques of reconstruction, appropriate patient selection, and management of common complications. The book also includes chapters on management of complications encountered with various forms of diversion. There are also chapters devoted to quality of life following urinary diversion and well as future perspectives. Urinary Diversion will be of great value for the urologist in training or in practice who wishes to not only expand the repertoire of urinary diversions offered to[...] More on www.springer.com/978-3-319-52185-5

Complications of Female Incontinence and Pelvic Reconstructive Surgery

The second edition of this text reviews the prevention, evaluation and management of complications arising
from female pelvic surgery. As the field has advanced and now become its own recognized subspecialty offering Board Certification there is even more interest in this area. This edition provides more specific detail of potential complications of robotic female pelvic surgery, different categories of midurethral slings and specific transvaginal apical procedures. There are unique complications based on the specific mode of sling placement or apical repair and they are further subdivided in this text. Potential complications of both routine and specialized vaginal procedures [...] More on www.springer.com/978-3-319-49854-6

Pelvic Floor Dysfunction and Pelvic Surgery in the Elderly: An Integrated Approach

This text provides a comprehensive, state of the art review of this field and will serve as a resource for urologists, colorectal surgeons, geriatricians, and gynecologists as well as researchers interested in neuromuscular phenomena in the pelvis. The book also reviews new data regarding risk factors for pelvic floor muscle dysfunction and profiles new minimally invasive surgical strategies for well known pelvic disease processes. Each chapter is chock full of data from landmark trials which have been published over the past few years and placed in context with respect to current management techniques for pelvic floor disorders. Written by experts in their field, Pelvic Floor [...] More on www.springer.com/978-3-319-48462-4

Urological and Gynaecological Chronic Pelvic Pain: Current Therapies

This text is designed for those clinicians who feel comfortable diagnosing these illnesses and wish to enhance their knowledge base and skill set regarding treatment options. Referrals for pelvic pain are common in urological and gynaecological practice; and may lead to varied diagnoses such as interstitial cystitis/bladder pain syndrome, chronic prostatitis/chronic pelvic pain syndrome, pelvic floor dysfunction, chronic orchialgia, and vulvodynia. To make matters more complex, each of these conditions is frequently associated by co-morbidities. The text is unique in being organized by the multiple and multifaceted therapies that are available, rather than by specific disorders. The [...] More on www.springer.com/978-3-319-48462-4

Clinical Application of Urologic Catheters, Devices and Products

Designed to provide a comprehensive and state-of-the-art overview of the use of urologic catheters and devices in clinical practice. Sections of the book have been structured to review the overall indication for the use of urologic catheters and devices, types available, complications and management. This text fills a critical need for resource materials on these topics. The book also includes highly practical presentations and of typical patients with catheters or devices seen in the clinical practice of geriatric urology, all in the form of case presentations with expert analysis and editorial commentary. Highlighting the integrated multidimensional aspects of care for urology [...] More on www.springer.com/978-3-319-149910-9

Imaging and Focal Therapy of Early Prostate Cancer

This text encompasses an up-to-date, comprehensive review of the state-of-the-art for gland preserving therapies. Fully updated and revised, this text evaluates the scientific evidence for the evolving trend to treat intermediate risk, clinically localized prostate cancer in a focally ablative manner with novel gland-preserving, focal therapy methods. Various ablative devices such as high intensity focused ultrasound, irreversible electroporation, photodynamic therapy, cryotherapy and laser ablation, among others, is discussed in regard to their strengths and limitations as a therapeutic modality. Emphasis is placed on patient selection and outcomes utilizing both advanced imaging [...] More on www.springer.com/978-3-319-149910-9

Penile Cancer: Diagnosis and Treatment

This fully updated and revised second edition address specifically some of the significant advances made in
our understanding of the pathophysiology of penile cancer including discussion of the suspected role of the human papilloma virus in penile carcinogenesis. Similarly, the molecular pathways implicated in precancerous and penile cancer will be discussed as these are the present targets of novel therapeutic approaches to this disease. The text details the recent national and international diagnostic and treatment guidelines that have been developed by both the National Comprehensive Cancer Network© and the European Urological Association establishing evidence based standards upon[...]

The Prostate Cancer Dilemma
Selecting Patients for Active Surveillance, Focal Ablation and Definitive Therapy

This text provides a comprehensive, state-of-the-art review of this field, and will serve as a valuable resource for clinicians, surgeons and researchers with an interest in early prostate cancer. The book reviews new data about genetic markers, transperineal mapping biopsy and mpMRI, how to apply each of these technologies in patients with elevated PSA, when a prior prostate biopsy performed by the standard TRUS method is negative and in cases where low risk disease is already diagnosed, how to differentiate those men who might harbor more aggressive disease from those who do not. Over 75% of newly diagnosed prostate cancer meets the criteria for low risk disease which has created[...]
