Emergency Clinical Diagnosis

The aim of this book is to help the reader achieve the correct diagnosis in the emergency setting, which continues to remain a challenge, given the variety of potential clinical presentations. Diagnostic failure is the largest reason for delays in provision of appropriate treatment, which can be life-saving, and the largest source of clinical complaints and untoward incidents leading to poor clinical outcomes and to litigation. In this book, the readers will find diagnostic checklists, organised according to potential emergency presentations and classified under body systems, including atypical presentations, lists of differential diagnoses and guidance to pattern recognition. Apart[...]

Emergency Department Management of Obstetric Complications

Obstetrical emergencies can be among the most stressful events an emergency physician will face in their entire career. The purpose of this book is to provide an evidence-based, practical approach to the wide spectrum of obstetric complications an emergency physician must be prepared to manage throughout all trimesters pregnancy as well as postpartum, including complications of assisted reproductive technology, bleeding, precipitous delivery and preterm labor. Clinical pearls and pitfalls are highlighted throughout. The approach to the pregnant patient with trauma, non-pregnancy-related abdominal pain, or in cardiac arrest is discussed. Updates in the classification and management of[...]

Primary Care for Emergency Physicians

This book is written for physicians who work within an emergency department or urgent care setting to provide them with a treatment plan for those patients who are deemed not to have an emergency medical situation and can be safely treated as an outpatient. Emergency physicians (EPs) see a wide variety of patients and ostensibly for emergency reasons. However, many patients present to the emergency department for primary care-related reasons due to multiple factors or are diagnosed with potentially chronic problems that require a primary care intervention. Examples include a new diagnosis of hypertension (without hypertensive emergency) or diabetes. Thus, it is prudent for the EP to[...]
