Spring 2017
The Saturn V F-1 Engine
Powering Apollo into History

The launch of Sputnik in 1957 not only began the space age, it also showed that Soviet rockets were more powerful than American ones. Within months, the US Air Force hired Rocketdyne for a feasibility study of an engine capable of delivering at least 1 million pounds of thrust. [...]
To create the exotic materials and technologies needed to make stargates and warp drives is the holy grail of advanced propulsion. A less ambitious, but nonetheless revolutionary, goal is finding a way to accelerate a spaceship without having to lug along a gargantuan reservoir of fuel that you blow out a tailpipe. [...]
The Craft of Scientific Presentations

Critical Steps to Succeed and Critical Errors to Avoid

The Craft of Scientific Presentations, 2nd edition aims to strengthen you as a presenter of science and engineering. The book does so by identifying what makes excellent presenters such as Brian Cox, Jane Goodall, Richard Feynman, and Jill Bolte Taylor so strong. [...] 2012. XIX, 286 p. 59 illus., 53 illus. in color. Softcover € (D) 48,10 | € (A) 49,45 | *CHF 64,50 € 44,95 | £ 40,99 ISBN 978-1-4614-0606-8

Deep Space Propulsion

A Roadmap to Interstellar Flight

The technology of the next few decades could possibly allow us to explore with robotic probes the closest stars outside our Solar System, and maybe even observe some of the recently discovered planets circling these stars. [...] 2012. XXI, 367 p. 73 illus., 22 illus. in color. Softcover € (D) 48,14 | € (A) 49,49 | *CHF 49,50 € 44,99 | £ 40,99 ISBN 978-3-319-17788-5

It’s ONLY Rocket Science

An Introduction in Plain English

For over fifty years satellites have circled the Earth and spacecraft have been used to explore our solar system. Every day ordinary people around the world use satellites for satellite television, GPS navigation, weather forecasts and other technologies. Many people are curious about how something gets into space - and stays there - and what the terms used in the media actually mean. [...] 2008. XIV, 350 p. 70 illus., 35 illus. in color. (Astronomers’ Universe) Softcover € (D) 26,70 | € (A) 27,45 | *CHF 36,00 € 24,95 | £ 19,99 ISBN 978-0-387-75377-5

The Physics of Invisibility

A Story of Light and Deception

The ability is see is fundamental to our very existence. How true our perceptions really are depends upon many factors, and not least is our understanding of what light is and how it interacts with matter. It was said that the camera, the icon of light recording instruments, never lies, and in the day of the glass plate and celluloid roll-film this might well have been true. [...] 2012. Food Bites
The Science of the Foods We Eat
Food Bites is an easy-to-read, often humorous book on the scientific basis of the foods we eat, and answers those pesky, niggling questions such as: Is the quality of beer really affected by the type of water used? and Processed foods: good or bad? [...] 2013. IX, 190 p. 2 illus. Softcover

Near-Death Experiences
Heavenly Insight or Human Illusion?
The expression “Near-Death Experience” is associated in the popular understanding with access to knowledge about our transition between the states of life and death. But how should such experiences be interpreted? Are they verifiable with scientific methods? If so, how can they be explained? [...] 2014. VI, 150 p. 20 illus. (Copernicus) Softcover

Homeopathy - The Undiluted Facts
Including a Comprehensive A-Z Lexicon
This book traces the genesis, principles and practice of homeopathy, and discusses the reasons for its enduring popularity. Two hundred years ago, medicine had little to offer except blood letting and the administration of violent purgatives – practices which shortened the course of illness by hastening the death of the patient. [...] 2016. X, 151 p. 27 illus., 18 illus. in color. (Copernicus) Softcover

Big Science Transformed
Science, Politics and Organization in Europe and the United States
This book analyses the emergence of a transformed Big Science in Europe and the United States, using both historical and sociological perspectives. It shows how technology-intensive natural sciences grew to a prominent position in Western societies during the post-World War II era, and how their development cohered with both technological and social developments. The Future of Human Space Exploration
For several decades it has been widely accepted that human space exploration is the exclusive domain of government agencies. The cost of performing such missions, estimated in multiple reports to amount to hundreds of billions dollars over decades, was far beyond what private entities could afford. [...] 2016. Health Without Borders
Epidemics in the Era of Globalization
This book discusses globalization and its impact on human health. The population of the world grew from 1 billion in 1800 to 7 billion in 2012, and over the past 50 years the mean temperature has risen faster than ever before. Both factors continue to rise, as well as health inequalities. Our environment is changing rapidly, with tremendous consequences for our health. [...] 2017. X, 138 p. Softcover

In a recent study, ninety percent of women stated that they ‘expect to transition’ within the next five years. Rather than be frustrated, Rossetti argues that with thought and some elbow grease, transition is not only healthy but rewarding. Women and Transition is a step-by-step how-to guide that every woman can learn from.
