Professional and Applied Computing

Key New Titles and Bestsellers

Selection of the Year 2017
New Publications
Professional and Applied Computing

Dear reader,

Springer Nature is proud to offer you an excellent choice of key print titles – new as well as proven publications - in Professional and Applied Computing. If you are looking for something very specific, go to our online catalog at springer.com and search among the 279,255 books in print by keyword. The Advanced Search makes it easy to define any scientific subject you have. You can even download a catalog just like this one with your own personal selection – completely free of charge!

We hope you will enjoy browsing through our new titles and make your selection today!

With best wishes,

Ria Frauenfeld

Learn Salesforce Lightning
The Visual Guide to the Lightning UI
Refer to this invaluable how-to guide for users looking for basic training on Salesforce Lightning. Currently there are no publications to turn to, so salespeople as well as technical users and consultants must resort to learning the interface on their own, which is very time-consuming without any guidance. [...] 2017. Approx. 200 p. Softcover approx. € 36,99 | £ 27,99 approx. € (D) 39,58 | € (A) 40,69 | *CHF 41,00 ISBN 978-1-4842-2993-4

M. Farouk, Muscat, Oman

Infrastructure Software Modules for Enterprises
Flexible Software Systems, Module Use-Cases, and Wireframes
Reduce the time spent analyzing infrastructure modules while lowering your cost and resources in the process. Most software project teams that develop custom software build the systems from scratch. With limited budgets and time, they often concentrate on the business functionality and try to minimize or ignore the infrastructure functionality. [...] 2017. Quick Clojure
Effective Functional Programming
Get up to speed with Clojure in this quick and practical primer. You’ll learn the nuts and bolts of functional programming, data structures, sequences, destructuring, pattern matching, polymorphism, concurrency, conventions, and more. Author Mark McDonnell talks about organization with namespaces; how to change the language via macros; object-oriented programming; and creating command-line apps. […]
