Mathematics

Key New Titles and Bestsellers

Selection of the Year 2017

Autumn 2017
New Publications  
Mathematics

Dear reader,

Springer Nature is proud to offer you an excellent choice of key print titles – new as well as proven publications – in Mathematics. If you are looking for something very specific, go to our online catalog at springer.com and search among the 279,255 books in print by keyword. The Advanced Search makes it easy to define any scientific subject you have. You can even download a catalog just like this one with your own personal selection – completely free of charge!

We hope you will enjoy browsing through our new titles and make your selection today!

With best wishes,

Ria Frauenfeld

Algebra, Geometry, and Physics in the 21st Century

Kontsevich Festschrift

This volume is a tribute to Maxim Kontsevich, one of the most original and influential mathematicians of our time. [...] 2017. X, 358 p. 65 illus., 40 illus. in color. (Progress in Mathematics, Volume 324) Hardcover $129.00 ISBN 978-3-319-59938-0

Due August 2017
D. Auroux, University of California, Berkeley, CA, USA; A. Katzarkov, Universität Wien, Wien, Austria; T. Pantev, University of Pennsylvania, Philadelphia, PA, USA; Y. Soibelman, Kansas State University, Manhattan, KS, USA; Y. Tschinkel, New York University, New York, NY, USA (Eds)

Numerical Linear Algebra: Theory and Applications

This book combines a solid theoretical background in linear algebra with practical algorithms for numerical solution of linear algebra problems. [...] 2017. XII, 524 p. 15 illus., 14 illus. in color. With online files/update. Hardcover $89.99 ISBN 978-3-319-57302-1

Due August 2017
L. Beilina, Chalmers University of Technology, Gothenburg, Sweden; E. Karchevskii, Kazan Federal University, Kazan, Russia; M. Karchevskii, Kazan Federal University Department of Computational Mathematics, Kazan, Russia

Groups, Matrices, and Vector Spaces

A Group Theoretic Approach to Linear Algebra

This unique text provides a geometric approach to group theory and linear algebra, bringing to light the interesting ways in which these subjects interact. Requiring few prerequisites beyond understanding the notion of a proof, the text aims to give students a strong foundation in both geometry and algebra. [...] 2017. XV, 387 p. Hardcover $59.99 ISBN 978-0-387-79427-3

Due August 2017
J. B. Carrell, University of British Columbia, Vancouver, BC, Canada

Perspectives in Lie Theory

Lie theory is a mathematical framework for encoding the concept of symmetries of a problem, and was the central theme of an INdAM intensive research period at the Centro de Giorgi in Pisa, Italy, in the academic year 2014-2015. [...] 2017. X, 456 p. 18 illus., 5 illus. in color. (Springer INdAM Series, Volume 19) Hardcover $129.00 ISBN 978-3-319-58970-1

Due August 2017
F. Callegaro, Università di Pisa, Pisa, Italy; G. Carnovale, University of Padova, Padova, Italy; F. Caselli, University of Bologna, Bologna, Italy; C. De Concini, Sapienza University of Rome, Roma, Italy; A. De Sole, Sapienza University of Rome, Roma, Italy (Eds)

Moduli of Curves

CIMAT Guanajuato, Mexico 2016

Providing a timely description of the present state of the art of moduli spaces of curves and their geometry, this volume is written in a way which will make it extremely useful both for young people who want to approach this important field, and also for established researchers, who will find references, problems, original expositions, new viewpoints, etc. [...] 2017. X, 190 p. 66 illus., 54 illus. in color. (Lecture Notes of the Unione Matematica Italiana, Volume 21) Softcover $49.99 ISBN 978-3-319-59485-9

Due September 2017
L. Brambila Paz; C. Ciliberto; E. Esteves; M. Melo; C. Voisin (Eds)

Springer Monograph

Springer Contributed volume

Springer Graduate/Advanced undergraduate textbook

Springer Graduate/Advanced undergraduate textbook

Springer Graduate/Advanced undergraduate textbook

Springer Graduate/Advanced undergraduate textbook
This book casts the theory of periods of algebraic varieties in the natural setting of Madhav Nori’s abelian category of mixed motives.

2017. XXIII, 372 p. 7 illus. (Ergebnisse der Mathematik und ihrer Grenzgebiete. 3. Folge / A Series of Modern Surveys in Mathematics, Volume 65) Hardcover
$129.00
ISBN 978-3-319-50925-9

---

The theories of V. V. Wagner (1908-1981) on abstractions of systems of binary relations are presented here within their historical and mathematical contexts. This book contains the first translation from Russian into English of a selection of Wagner’s papers, the ideas of which are connected to present-day mathematical research.

2017. XII, 272 p. 15 illus., 12 illus. in color. (UNIPA Springer Series) Hardcover
$129.00
ISBN 978-3-319-62180-7

---

This book takes the reader on a journey through the world of college mathematics, focusing on some of the most important concepts and results in the theories of polynomials, linear algebra, real analysis, differential equations, coordinate geometry, trigonometry, elementary number theory, combinatorics, and probability.

2nd ed. 2017. XVIII, 918 p. 123 illus. Hardcover
$79.99
ISBN 978-3-319-58986-2

---

This book explores the theory and application of locally nilpotent derivations, a subject motivated by questions in affine algebraic geometry and having fundamental connections to areas such as commutative algebra, representation theory, Lie algebras and differential equations.

$169.00
ISBN 978-3-662-55348-0

---

This book casts the theory of periods of algebraic varieties in the natural setting of Madhav Nori’s abelian category of mixed motives.

2017. XVIII, 372 p. 7 illus. (Ergebnisse der Mathematik und ihrer Grenzgebiete. 3. Folge / A Series of Modern Surveys in Mathematics, Volume 65) Hardcover
$129.00
ISBN 978-3-319-50925-9
Inverse Galois Theory

This second edition addresses the question of which finite groups occur as Galois groups over a given field. In particular, this includes the question of the structure and the representations of the absolute Galois group of $K$, as well as its finite epimorphic images, generally referred to as the inverse problem of Galois theory. [...] 2nd ed. 2017. X, 530 p. (Springer Monographs in Mathematics) Hardcover

$149.00
ISBN 978-3-662-55419-7

Due August 2017

R. Lal, Harish Chandra Research Institute (HRI), Allahabad, India

Algebra 1

Groups, Rings, Fields and Arithmetic

This is the first in a series of three volumes dealing with important topics in algebra. It offers an introduction to the foundations of mathematics together with the fundamental algebraic structures, namely groups, rings, fields, and arithmetic. [...] 2017. XVII, 433 p. (Infosys Science Foundation Series) Hardcover

$79.99

Available

R. Lal, Harish Chandra Research Institute (HRI), Allahabad, India

Algebra 2

Linear Algebra, Galois Theory, Representation theory, Group extensions and Schur Multiplier

This is the second in a series of three volumes dealing with important topics in algebra. Volume 2 is an introduction to linear algebra (including linear algebra over rings), Galois theory, representation theory, and the theory of group extensions. [...] 2017. XVIII, 432 p. (Infosys Science Foundation Series) Hardcover

Ramanujan Summation of Divergent Series

This book aims to face particles in flows from many different, but essentially interconnected sides and points of view. [...] 2017. X, 580 p. 170 illus., 156 illus. in color. (Advances in Mathematical Fluid Mechanics) Hardcover

$149.00
ISBN 978-3-319-60281-3

Particles in Flows

This book presents current research on Ulam stability for functional equations and inequalities. Contributions from renowned scientists emphasize fundamental and new results, methods and techniques. Detailed examples are given to theories to further understanding at the graduate level for students in mathematics, physics, and engineering. [...] 2017. VIII, 342 p. 2 illus. (Springer Optimization and Its Applications, Volume 124) Hardcover

$129.00
ISBN 978-3-319-61731-2

Developments in Functional Equations and Related Topics

This volume consists of contributions spanning a wide spectrum of harmonic analysis and its applications written by speakers at the February Fourier Talks from 2002 – 2016. [...] 2017. XVIII, 338 p. 64 illus., 36 illus. in color. (Applied and Numerical Harmonic Analysis) Hardcover

$129.00
ISBN 978-3-319-54710-7

Excursions in Harmonic Analysis, Volume 5

The February Fourier Talks at the Norbert Wiener Center

This book presents the most relevant results from the INdAM Workshop “Shocks, Singularities and Oscillations in Nonlinear Optics and Fluid Mechanics” held in Rome, September 14-18, 2015. [...]

2017. XII, 308 p. 17 illus., 15 illus. in color. (Springer INdAM Series, Volume 17) Hardcover

Novel Methods in Computational Finance

Flows of Non-Smooth Vector Fields and Degenerate Elliptic Equations
With Applications to the Vlasov-Poisson and Semigeostrophic Systems
Approximation with Positive Linear Operators and Linear Combinations

This book presents a systematic overview of approximation by linear combinations of positive linear operators, a useful tool used to increase the order of approximation. [...] 2017. XIII, 186 p. 2 illus. in color. (Developments in Mathematics, Volume 50) Hardcover $109.00 ISBN 978-3-319-58794-3

Available

Quantum Symmetries

Providing an introduction to current research topics in functional analysis and its applications to quantum physics, this book presents three lectures surveying recent progress and open problems. A special focus is given to the role of symmetry in non-commutative probability, in the theory of quantum groups, and in quantum physics. [...] 2017. X, 108 p. 3 illus. in color. (Lecture Notes in Mathematics, Volume 2189) Softcover $49.99 ISBN 978-3-319-63205-6

Due September 2017

Singular Limits in Thermodynamics of Viscous Fluids

This book is about singular limits of systems of partial differential equations governing the motion of thermally conducting compressible viscous fluids. [...] 2nd ed. 2017. XX, 510 p. (Advances in Mathematical Fluid Mechanics) Hardcover $149.00 ISBN 978-3-319-63780-8

**Ergodic Theory and Negative Curvature**

CIRM Jean-Morlet Chair, Fall 2013

Focussing on the mathematics related to the recent proof of ergodicity of the (Weil–Petersson) geodesic flow on a nonpositively curved space whose points are negatively curved metrics on surfaces, this book provides a broad introduction to an important current area of research. [...] 2017. X, 334 p. 68 illus., 17 illus. in color. (Lecture Notes in Mathematics, Volume 2164) Softcover

$ 59.99  
ISBN 978-3-319-43058-4

S. G. Krantz, Washington Univ Dept of Math, Saint Louis, MO, USA

**Harmonic and Complex Analysis in Several Variables**

Authored by a ranking authority in harmonic analysis of several complex variables, this book embodies a state-of-the-art entrée at the intersection of two important fields of research: complex analysis and harmonic analysis. [...] 2017. VIII, 491 p. 13 illus. (Springer Monographs in Mathematics) Hardcover

$ 129.00  
ISBN 978-3-319-63229-2

T. Lee; M. Leok; N. H. McClamroch

**Global Formulations of Lagrangian and Hamiltonian Dynamics on Manifolds**

A Geometric Approach to Modeling and Analysis

This book provides an accessible introduction to the variational formulation of Lagrangian and Hamiltonian mechanics, with a novel emphasis on global descriptions of the dynamics, which is a significant conceptual departure from more traditional approaches based on the use of local coordinates on the configuration manifold. [...] 2018. XXVII, 539 p. 49 illus. (Interaction of Mechanics and Mathematics) Softcover

$ 89.99  
ISBN 978-3-319-56951-2

A. Y. Khapalov, Washington State University, Pullman, WA, USA

**Mobile Point Sensors and Actuators in the Controllability Theory of Partial Differential Equations**

This book presents a concise study of controllability theory of partial differential equations when they are equipped with actuators and/or sensors that are finite dimensional at every moment of time. [...] 2017. XX, 220 p. 11 illus. Hardcover

$ 109.00  
ISBN 978-3-319-60413-8

P. Loya, Binghamton University, Binghamton, NY, USA

**Amazing and Aesthetic Aspects of Analysis**

Lively prose and imaginative exercises draw the reader into this unique introductory real analysis textbook. Motivating the fundamental ideas and theorems that underpin real analysis with historical remarks and well-chosen quotes, the author shares his enthusiasm for the subject throughout. [...] 2017. XXI, 722 p. 122 illus. (Undergraduate Texts in Mathematics) Hardcover

$ 69.99  
K. A. Lurie, Worcester Polytechnic Institute, Worcester, MA

**An Introduction to the Mathematical Theory of Dynamic Materials**

Mathematical treatment to properties of dynamic materials, material substances whose properties are variable in space and time are examined in this book. This new edition emphasizes the differences between material optimization techniques in statics and dynamics. [...]

approx.$ 109.00
ISBN 978-3-319-65345-7

S. Lynch, Manchester Metropolitan University Dept. Computing & Mathematics, Manchester, UK

**Dynamical Systems with Applications using Mathematica®**

This textbook, now in its second edition, provides a broad introduction to the theory and practice of both continuous and discrete dynamical systems with the aid of the Mathematica software suite. Taking a hands-on approach, the reader is guided from basic concepts to modern research topics. [...]

M. Th. Rassias, ETH Zürich, Zürich, Switzerland

**Goldbach’s Problem**

**Selected Topics**

Important results surrounding the proof of Goldbach’s ternary conjecture are presented in this book. Beginning with an historical perspective along with an overview of essential lemmas and theorems, this monograph moves on to a detailed proof of Vinogradov’s theorem. The principles of the Hardy-Littlewood circle method are outlined and applied to Goldbach’s ternary conjecture. [...] 2017. XV, 122 p. Softcover

A. Quarteroni, École Polytechnique Fédérale de Lausanne, Lausanne, Switzerland

**Numerical Models for Differential Problems**

In this text, we introduce the basic concepts for the numerical modelling of partial differential equations. We consider the classical elliptic, parabolic and hyperbolic linear equations, but also the diffusion, transport, and Navier-Stokes equations, as well as equations representing conservation laws, saddle-point problems and optimal control problems. [...] 3rd ed. 2017. X, 687 p. 236 illus., 61 illus. in color. (MS&A, Volume 16) Hardcover

M. Th. Rassias, ETH Zürich, Zürich, Switzerland

**Goldbach’s Problem**

**Selected Topics**

Important results surrounding the proof of Goldbach’s ternary conjecture are presented in this book. Beginning with an historical perspective along with an overview of essential lemmas and theorems, this monograph moves on to a detailed proof of Vinogradov’s theorem. The principles of the Hardy-Littlewood circle method are outlined and applied to Goldbach’s ternary conjecture. [...] 2017. XV, 122 p. Softcover
