Engineering & Energy

Dear reader,

Springer Nature is proud to offer you an excellent choice of key print titles – new as well as proven publications - in Engineering & Energy. If you are looking for something very specific, go to our online catalog at springer.com and search among the 279,255 books in print by keyword. The Advanced Search makes it easy to define any scientific subject you have. You can even download a catalog just like this one with your own personal selection – completely free of charge!

We hope you will enjoy browsing through our new titles and make your selection today!

With best wishes,

**Sustainable Development in Energy Systems**

Presenting the latest research on the sustainable development of energy systems, this book provides a broad and holistic perspective on various aspects of renewable energy sources and grid integration. [...] 2017. XII, 231 p. 115 illus. Hardcover  $129.00 ISBN 978-3-319-54806-7

**Catalysis for Green Energy and Technology**

This book describes the importance of catalysis for the sustainable production of biofuels and biochemicals, focusing primarily on the state-of-the-art catalysts and catalytic processes expected to play a decisive role in the "green" production of fuels and chemicals from biomass. [...] 2017. VIII, 207 p. 31 illus. (Green Energy and Technology) Hardcover  $129.00 ISBN 978-3-319-43103-1

**Renewable Energy Clusters**

Recurring Barriers to Cluster Development in Eleven Countries

Taking eleven countries in Europe, Canada, South Africa, America, Latin America and Australia, this book discusses recurring barriers to cluster development in the renewable energy sector. [...] 2017. XIII, 259 p. 112 illus., 87 illus. in color. (Innovation, Technology, and Knowledge Management) Hardcover  $129.00 ISBN 978-3-319-50363-9

**Resurgence of Nuclear Power**

Challenges and Opportunities for Asia

This book focuses on the issue of 'resurgence of nuclear power' and discusses the feasibility of nuclear in the energy mix of Asian economies. It discusses nuclear energy sector in detail in the context of India, a country where currently overseas supply of hydrocarbon fuels plays a major role in meeting the domestic energy needs. [...] 2017. XX, 301 p. 13 illus. Hardcover  $179.00 ISBN 978-981-10-5028-2
Advanced Solar-Distillation Systems
Basic Principles, Thermal Modeling, and Its Application

This book is primarily intended to serve as a textbook and reference work for graduate and professional training coursework on solar desalination of water. [...] 2017. XXVII, 468 p. 141 illus., 95 illus. in color. (Green Energy and Technology) Hardcover $ 99.00 ISBN 978-981-10-4671-1

Lithium-Ion Batteries: Basics and Applications

The handbook focuses on a complete outline of lithium-ion batteries. Just before starting with an exposition of the fundamentals of this system, the book gives a short explanation of the newest cell generation. The most important elements are described as negative / positive electrode materials, electrolytes, seals and separators. [...] 2017. X, 390 p. 224 illus., 6 illus. in color. Hardcover $ 139.00 ISBN 978-3-662-53069-6

Nuclear Reactor Physics

Anti-reflection and Light Trapping in c-Si Solar Cells

This book offers essential insights into c-Si based solar cells and fundamentals of reflection, refraction, and light trapping. The basic physics and technology for light trapping in c-Si based solar cells are covered, from traditional to advanced light trapping structures. [...] 2017. XXIX, 186 p. 128 illus., 88 illus. in color. (Green Energy and Technology) Hardcover $ 129.00 ISBN 978-981-10-4770-1

The Energy Transition

An Overview of the True Challenge of the 21st Century

Against the backdrop of rapid advances in the energy sector, this book provides a concise overview of the complex challenges in the energy paradigm today, which revolve around the seemingly unsolvable energy equation. The author, an experienced energy professional, combines the various aspects of the energy transition into a single perspective. [...] 2017. XVII, 172 p. 143 illus. in color. Bounded Rationality in Decision Making Under Uncertainty: Towards Optimal Granularity

This book addresses an intriguing question: are our decisions rational? It explains seemingly irrational human decision-making behavior by taking into account our limited ability to process information. It also shows with several examples that optimization under granularity restriction leads to observed human decision-making.

Reliability Improvement Technology for Power Converters

This book describes how to design circuits in power electronics systems using a reliability approach in three-level topologies, which have many advantages in terms of the current total harmonic distortion and efficiency.

Full-Duplex Wireless Communications Systems
Self-Interference Cancellation

This book introduces the development of self-interference (SI)-cancellation techniques for full-duplex wireless communication systems. The authors rely on estimation theory and signal processing to develop SI-cancellation algorithms by generating an estimate of the received SI and subtracting it from the received signal.

T. Le-Ngoc; R. Dawadi; S. Parsaeefard; M. Derakhshani
Virtualized Wireless Networks
User Association and Resource Allocation

There have been recent advancements in wireless network technologies such as wireless virtualization to accommodate the exponential growth in demand, as well as to increase energy and infrastructure efficiencies.
