Controlled Release Society (CRS)
eBook distribution factsheet

The Controlled Release Society (CRS) is the premier society worldwide for delivery science and technology. The CRS serves more than 1,600 members from more than 50 countries. Two-thirds of the CRS membership represents industry and one-third represents academia and government.

Interest in applications in the pharmaceutical field has been a key component to growth in membership in the CRS since its founding. Today, the primary interest of about 70% of the CRS membership is in the pharmaceutical area (including 5-10% veterinary) and 30% in the non-pharmaceutical areas (consumer and diversified products).

www.controlledrelease.org

All scientific, English books that CRS publishes in 2011/with 2011 copyright year will be part of the Biomedical and Life Sciences eBook collection. It is estimated that this will be approximately 4 titles per CRY.

- Springer has acquired the exclusive distribution rights for eBooks and print as well.
- No backlist titles are included in the deal.
- Springer also publishes the official CRS journal: Drug Delivery and Translational Research.

List of forthcoming titles:
- The Fundamentals of Drug Delivery
- Long Acting Injections and Implants
- Controlled Pulmonary Drug Delivery
- Controlled Oral Drug Delivery
- RNA Interference Therapeutics
- Vaginal Drug Delivery: Hormones, Microbicides and Vaccines

More information on the CRS can be found on their website.
