A. M. Weinberg.

The First Nuclear Era

Alvin Weinberg is one of the most influential nuclear engineers & physicists in the U.S., having participated in many high profile projects from the early days of nuclear research on into the 1980s. This book is his autobiography and it’s peppered with first-hand accounts of major historical events. He writes about the events of December 2, 1942, when Fermi set into motion the first chain reaction in a uranium pile and goes on to describe what happened during the “First Nuclear Era” a period he admits that has now largely run its course. [...]

The Saturn V F-1 Engine

The launch of Sputnik in 1957 not only began the space age, it also showed that Soviet rockets were more powerful than American ones. Within months, the US Air Force hired Rocketdanye for a feasibility study of an engine capable of delivering at least 1 million pounds of thrust. [...]

Beyond Fear

Many of us, especially since 9/11, have become personally concerned about issues of security, and this is no surprise. Security is near the top of government and corporate agendas around the globe. Security-related stories appear on the front page everyday. How well though, do any of us truly understand what achieving real security involves? [...]

R. Gilmore, *Alice in Quantumland*

Alice is about to enter a whole new Wonderland. It’s Quantumland—a kind of intellectual amusement park, smaller than an atom, where each attraction demonstrates a different aspect of quantum theory. There she’ll meet an Emperor who thinks his new clothes into existence, dance with the Three Quark Brothers at the Particle MASSquerade, travel back in time (running into herself), and experience all kinds of quantum effects. Readers will learn about the Uncertainty Principle, wave functions, the Pauli Principle, and other elusive concepts.

Bubbles, Booms, and Busts

This book deals at some length with the question: Since there are many more poor than rich, why don’t the poor just tax the rich heavily and reduce the inequality? In the 19th century and the first half of the 20th century, the topic of inequality was discussed widely. Ending or reducing inequality was a prime motivating factor in the emergence of communism and socialism. [...] Available
