Textbook of Hand Eczema

Hand eczema is a major complaint worldwide and a frequent occupational disorder. This book provides a comprehensive and detailed overview of the classification, etiology, diagnosis, prevention, and therapy of hand eczema. It is innovative, up to date, and practical. The links with particular occupations are explained, the various diagnostic tests are presented, and the role of different topical and systemic treatments is clearly described. The authors are world leaders in the field. The "Textbook of Hand Eczema" reflects a new era in hand dermatitis and will be invaluable for all who deal with the condition in their clinical practice.

Non Invasive Diagnostic Techniques in Clinical Dermatology

This book is a comprehensive but compact guide to the latest technical and technological developments in the growing field of non invasive diagnosis in clinical dermatology. Information is provided on the practical and technical characteristics of a wide range of equipment and methods for in vivo measurements that aid in the investigation of skin function, the evaluation of topically applied products and the monitoring of skin disease. Individual sections are devoted to imaging techniques, skin analysis, superficial skin analysis, skin mechanics, water and stratum corneum hydration and erythema and blood flow. All of the authors are experts in the field, with detailed knowledge of the[...]

Patch Testing Tips

Recommendations from the ICDRG

This book is a compendium of tips on many different aspects of patch testing based on the recommendations of the International Contact Dermatitis Research Group (ICDRG), which is the reference group for all dermato-allergologists. It is intended to complement the book Patch Testing and Prick Testing: A Practical Guide by J.-M. Lachapelle and H. Maibach, which is an official publication of the ICDRG now in its third edition. Among the wide variety of topics covered are pitfalls, legal aspects, patch testing with ultrasonic bath extracts, the role of patch testing in occupational contact dermatitis and atopic dermatitis, semi-open tests, the implications of a negative test, patch[...]

Clinical Cases in Psychocutaneous Disease

Clinical cases are a key component in modern medical education, assisting the trainee or recertifying clinician to work through unusual cases using best practice techniques. Dermatology is an important discipline in this regard since it is a highly visual subject requiring the reader to describe often very subtle

differences in the presentation of patients and define accurately the diagnostic and management criteria to base their clinical decision-making on. This is particularly the case in the field of psychocutaneous disease where scientific advances are shedding new light on the understanding and treatment of long-recognized conditions located at the interface of dermatology and [...]

Nail Disorders

A Practical Guide to Diagnosis and Management

This book is designed to meet the need for a concise, easy-to-read text on how to approach and manage patients with nail diseases. The book opens with a description of nail anatomy and physiology, followed by a review of nail symptoms, divided according to the part of the nail apparatus involved. Non-invasive and invasive tools for the diagnosis of nail disorders are then described and insights provided into their appropriate use. Subsequent chapters review the various nail diseases, covering hereditary, traumatic, inflammatory, environmentally induced, druginduced and neoplastic conditions as well as disorders due to systemic diseases. Informative high-quality illustrations are[...]

Le basi della dermatologia

Anatomia • Fisiologia • Lesioni elementari • Indagini diagnostiche • Correlazioni clinicopatologiche • Note di terapia • Comuni affezioni dermatologiche

Il testo "Le basi della dermatologia" si propone di condurre il medico all'identificazione e valutazione delle lesioni elementari, nonché alla conoscenza delle più moderne tecniche diagnostiche, per permettere un'interpretazione ragionata e corretta del quadro clinico, senza tralasciare le correlazioni istopatologiche e le appropriate opzioni terapeutiche. L'esatta conoscenza dell'anatomia e della fisiopatologia della cute è infatti fondamentale per un corretto inquadramento clinico-diagnostico del paziente dermatologico. In quest'ottica, è stato aggiunto alla seconda edizione del volume un nuovo capitolo che descrive le più comuni affezioni dermatologiche indicandone in modo[...]

Handbook of Cutaneous Melanoma

A Guide to Diagnosis and Treatment

Handbook of Cutaneous Melanoma is a concise review, which discusses epidemiology, pathogenesis, clinical features, diagnosis and staging, and current and emerging treatments for local and metastatic disease. The Handbook is heavily illustrated with diagnostic guides and treatment algorithms from Dr Schadendorf (which are supported by national and international guidelines), as well as numerous images from his practice to support the text. Busy healthcare professionals who want a quick review of diagnostic and staging guidelines as well as a summary of current therapies for cutaneous melanoma will benefit from this succinct guide.

Tricologia ambulatoriale

Malattie dei capelli e del cuoio capelluto

Questo volume è una guida aggiornata alla diagnosi, alla terapia e alla gestione delle numerose malattie e alterazioni dei capelli e dei peli, e particolare attenzione è stata dedicata a quei disturbi che si è iniziato a studiare da pochi anni e tecniche diagnostiche di recente impiego. Negli ultimi anni la ricerca scientifica ha infatti compiuto notevoli progressi nel campo della tricologia e oggi sono disponibili nuove tecniche diagnostiche e terapie specifiche. Questo testo accompagnerà il dermatologo, il chirurgo plastico e il medico generico nel riconoscimento e nella comprensione delle più frequenti malattie dei capelli e dei peli, fornendo suggerimenti per la gestione corretta[...]

Male Alopecia

Guide to Successful Management

This monograph provides specialists and primary care physicians who are interested in hair with the practical know-how needed to achieve successful management of male alopecia. Guidance is first provided on the examination of hair loss in men, covering such aspects as clinical examination, the role of trichoscopy and the trichogram, laboratory work-up and scalp biopsy. Diagnosis and treatment are then described in depth for a diverse range of conditions involving alopecia. Expert opinion is combined with the results of evidence-based medicine to provide the best current advice, highlighting the synergistic action of combination regimens and adjuvant treatments and explaining the[...]

Acneiform Eruptions in Dermatology

A Differential Diagnosis

Dermatologists commonly treat acne, which affects 40 to 50 million Americans each year and about 85 percent of all patients at some point in their lives. Dermatologists, primary care doctors, and pediatricians see these patients every day in practice. It is important to treat the skin effectively not only to reduce the risk of physical scarring, but also to address the negative psychosocial impact this disease carries. Improving the skin can improve self-confidence, interpersonal relationships, and performance in school or at work. Acneiform Eruptions in Dermatology is a practical, full-color guide to the differential

diagnosis of a cne vulgaris and the treatment of a cnelike[...]

Injectable Fillers in Aesthetic Medicine

This book offers an excellent and comprehensive overview on the clinical use of fillers in aesthetic medicine that will assist both novice and advanced practitioners. Based on an evidence-based perspective, the book opens by describing the most common fillers, with information on their characteristics, efficacy and safety. The main part of the book then explains how to use fillers for the most frequent facial indications, such as the glabella, nasolabial folds, infraorbital hollow, nose, cheeks, lips and marionette lines. This new edition also includes chapters on extrafacial indications and treatment planning. All specific aesthetic procedures for the facial and extrafacial areas are[...]
