Medical Management of Glaucoma

Medical Management of Glaucoma is a comprehensive review of glaucoma, current pharmacological therapies, and treatment guidelines for the disease as put forth by the American Academy of Ophthalmologists (AAO) and European Glaucoma Society (EGS). This book will review glaucoma's definition, classes, epidemiology, risk factors, pathogenesis (especially discussing intraocular pressure, aqueous humor production, and outflow), diagnosis and assessment tools, and current therapeutic options for patients. Medical Management of Glaucoma will also give ophthalmologists and related healthcare professionals insight into how the patient is affected by their disease by reviewing quality of life[...]

A Practical Guide to the Eustachian Tube

This book, written by international experts, is a detailed guide to the Eustachian tube, with emphasis on those aspects of most relevance to the practitioner. The opening chapters document the clinical anatomy and provide essential information on physiology, with explanation of the new model of tubal mechanics. Diagnosis and therapy for the patulous Eustachian tube are then discussed, placing special emphasis on a novel conservative treatment regimen that has proven to be a breakthrough for patients with this clinical syndrome. A further extensive chapter examines overall function of the Eustachian tube, primarily from the

middle ear surgeon's viewpoint. Tuboplasty procedures, [...]

Congenital Malformations of the Head and Neck

Congenital Malformations of the Head and Neck offers a unique conceptual and visual approach to children with congenital malformations of the head and neck. Developed by renowned leaders in the field, this title is richly illustrated with a wealth of patient photos, radiology and endoscopic images of malformations. Starting with the genetics of common congenital syndromes, Congenital Malformations of the Head and Neck goes on to comprehensively cover malformations of the ear, nose, nasopharynx, oral cavity, oropharynx, cleft lip and palate, larynx, trachea, and neck. Easy-to-read and an indispensable reference and teaching resource, this title will serve as an invaluable reference[...]

Diseases of the Vitreo-Macular Interface

This clinically oriented book is the first to be devoted wholly to the diagnosis and treatment of vitreo-macular interface disease, characterized by a combination

of vitreo-macular adhesion (VMA) and vitreo-macular traction (VMT) that is implicated in a variety of disorders. World-renowned experts in the field discuss epidemiologic, anatomic, and physiologic aspects, document the findings obtained with newer imaging techniques, such as spectral domain optical coherence tomography, describe the treatment options, and report on the results of preclinical and clinical trials, including some previously unpublished findings. This book will prove invaluable for ophthalmologists as we[...]

Vertigo and Balance Disorders in Children

Many congenitally deaf infants and children suffer vestibular failure, which produces problems with their postural control, locomotion and gait. However it is known that these children can eventually catch up with their normal balance control status in terms of development and growth as a result of central vestibular compensation. In Vertigo and Balance Disorders in Children the author provides comprehensive and integrative information on the vestibular system. The materials presented range from the history of its study, basic anatomy and physiology of vestibular organs, mechanism of balance and motor function development, to clinical aspects of vestibular disorders including their[...]

ENT Board Prep

High Yield Review for the Otolaryngology In-service and Board Exams

ENT Board Prep is a high-yield review that is an ideal study guide for the ENT in-service and board exams. While other review guides are low yield or more of a textbook, this is quick, concise, and easy-to-use, providing everything you need to know in a easy to digest format. ENT Board Prep offers review on sections such as cancer, ear, sinus, plastics, sleep, and laryngology, as well as case studies useful for studying for the oral board exams. Written and edited by leaders in the field, this book aims to serve future residents and fellows in those crucial weeks leading up to the ENT board exam.

G. Mankekar (Ed.)

Invasive Fungal Rhinosinusitis

Incidence of invasive fungal sinusitis has been increasing over the years. The understanding of its pathophysiology has improved with newer serological tests and diagnostic methods helping in earlier diagnosis and reducing patient morbidity. It was believed earlier that invasive fungal sinusitis is seen only in immune compromised patients but clinical reports suggest otherwise. More anti-fungal drugs are being added to improve incidence of patient survival. This book aims to compile all practical information about invasive fungal sinusitis into a single volume. Therefore, busy clinicians would not have to perform exhaustive literature studies to diagnose invasive fungal sinusitis. The [...]

Microperimetry and Multimodal Retinal Imaging

Microperimetry allows precise functional examination of the retina and optic nerve and is especially valuable for evaluation of the macular area. This fully up-to-date textbook on microperimetry, written by leading experts in the field, will also serve as an atlas and diagnostic reference. It is designed for use by both ophthalmologists and optometrists in daily clinical practice and clinical research, and the contents thus range from basic technical information to the most advanced clinical applications. Past and current microperimetry techniques are reviewed, and the role of microperimetry in the context of multimodal imaging scenario is explained. The full range of clinical [...]

Nonsurgical Peri-orbital Rejuvenation

This book offers surgeons the most up-to-date information related to non-surgical techniques specific to periorbital rejuvenation. This easy-to-use reference guide is for ophthalmologists, oculoplastic surgeons, dermatologists, plastic surgeons, maxillofacial and plastic surgery residents, as well as ENT facial plastic fellows. Complete with videos of specific tech-

niques to better inform surgeons about these evolving procedures, Nonsurgical Peri-orbital Rejuvenation teaches the reader how to measure predictable outcomes when deciding to approach the periorbital area. Topics covered include neurotoxins, peels, lasers, fillers, and skinceuticals.

Forthcoming

K. Nibu (Ed.)

Management of Tumors in the Temporal Bone

Various lesions including benign and malignant tumors develop in the temporal bone. Since these lesions are surrounded by compact bones involving critical organs such as internal carotid artery and cranial nerves, considerable experience and techniques are required in surgical treatment and surgical treatments often accompanied by severe sequelae. Thus, treatment plan depends on the type of pathology, size, involved structures, age, health status and patient preference. In general, young healthy patients with small tumors are good candidates for surgery. Patients in poor health or with large tumors may choose to undergo radiation or chemotherapy according to the type of pathology. [...]

Morphological Aspects of Inner Ear Disease

This book approaches inner ear diseases from a perspective that is as multifaceted as the diseases themselves. Common among these disorders are sudden deafness, Ménière's disease, and perilymphatic fistula. With an awareness of the generally insufficient understanding of the causes and etiologies of these and other inner ear diseases, the author helps to fill those gaps in knowledge. Several factors have impeded a clearer understanding of inner ear diseases, chiefly

the small size of the organ and its location in the hard temporal bone and, consequently, the inadequate resolution of CT and MRI images for pathophysiological analysis. This book provides morphological information about [...]

Surgical Innovations in Glaucoma

There is a revolution in new glaucoma surgical techniques. New glaucoma surgical devices are taking precedence in glaucoma surgery, with the new surgeries drastically cutting down on the chances for patient infection as well as higher success rates compared to the older types of surgery. *Surgical Innovations in Glaucoma* is the only book of its kind written by the top experts in the field, from inventors, clinical trial investigators, and top specialists experienced with the new devices. Written for general ophthalmologists who perform glaucoma surgery, the text walks the reader through the what, where, when, and how of the new glaucoma surgical tools, and includes supplementary online [...]

Ocular and Adnexal Lymphoma

This book – a conjoint effort of ocular oncologists, general oncologists, and pathologists – is a compre-

hensive source of authoritative information on the subject of ocular and adnexal lymphoma. It covers all aspects, including clinical features, classification, epidemiology, diagnostic evaluation, biopsy techniques, histology and molecular pathology, staging procedures, and treatment methods. Detailed information is provided on primary vitreoretinal and adnexal lymphomas and chapters are also included on rare variants such as T cell lymphoma and reactive lymphoid hyperplasia of the ocular adnexa. The emphasis throughout is on easy readability, and the layout ensures rapid retrieval [...]

Pathologic Myopia

Pathological Myopia is a major cause of severe vision loss worldwide. The mechanisms for vision loss include cataract, glaucoma, retinal detachment, and above all, degeneration of the macula within the posterior staphyloma. *Pathological Myopia* is one of the only current books to specifically address this disease and discusses recent developments in imaging technologies and various approaches to treatments, such as laser photocoagulation, photodynamic therapy, pharmacotherapeutic injections in the vitreous, and surgery. Complete with high-quality color images, this book is written and edited by leaders in the field and is geared towards ophthalmologists, including residents and fellows [...]
