Knowledge matters. Choose SpringerLink.
The World’s Leading Research Platform

SpringerLink delivers fast, accurate access to over 10 million scientific documents in the world’s most complete online collection of Science, Technology and Medicine (STM) and Humanities and Social Sciences (HSS) books, journals, reference works and protocols covering a vast range of disciplines.

What is available on SpringerLink

SpringerLink is built on the latest technologies to provide maximum flexibility and usability. Its sophisticated search and discovery tools deliver results with the speed, accuracy and convenience that users need while responsive design of headers and menus allows for optimal browsing on a desktop, tablet or phone. No Digital Rights Management (DRM) limitations means registered users can also access content whenever and however they choose, free from licensing restrictions.

Access the latest research

The depth and breadth of content available on SpringerLink coupled with sophisticated search tools makes SpringerLink the platform of choice for hundreds of thousands of researchers worldwide. Content is regularly updated and approximately 10,000 new eBooks, 3,000 new protocols and over 270,000 journal articles are added each year. SpringerLink content is semantically linked to create a vast but navigable network of information, easily accessible using SpringerLink’s intuitive tools.

Springer and Palgrave Archives

Accessing the latest contemporary research is a key factor in research workflows, but historical research underpins many of today’s breakthroughs. As well as the latest information, SpringerLink includes the Springer and Palgrave Macmillan Archive collections of journals and books authored by leading scientists whose work laid the foundations for modern scientific understanding. The Springer Journal Archives includes more than 2 million articles from over 1,000 journals, going back to volume 1, and the Springer Book Archives including the Palgrave Archives span over 120,000 previously hard to find titles dating back to the 1840’s.
Other key benefits of SpringerLink include:

<table>
<thead>
<tr>
<th>Benefit</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Speed to facilitate research</td>
<td>Fast access to research is a key requirement of today’s researcher. SpringerLink is fast, delivering results up to 3 times quicker than our previous platform.</td>
</tr>
<tr>
<td>Mobile optimized</td>
<td>Mobile optimized responsive design of headers and menus allows for optimal browsing on a desktop, tablet or phone without losing any essential functionality or pushing critical content further down the page.</td>
</tr>
<tr>
<td>Look inside</td>
<td>Look Inside gives access to the first two pages of a document the library doesn’t own, enabling users to gauge the value and relevance of the work before a purchase decision is made. Look Inside applies to eBooks and other content types.</td>
</tr>
<tr>
<td>Springer Alerts and RSS feeds</td>
<td>Users can set up publication alerts based on author, subject, keyword and publication or subscribe to Springer’s RSS (Really Simple Syndication) feeds to get new titles delivered directly to their desktop. Visit springer.com/alerts for more information.</td>
</tr>
<tr>
<td>MyCopy</td>
<td>MyCopy is a print-on-demand service that lets users order a personal soft cover edition of Springer eBook titles for a fraction of the usual print cost. Over 25,000 titles are available via MyCopy to registered patrons of libraries that have purchased Springer eBook titles or collections. My Copy is available in 30 countries.</td>
</tr>
<tr>
<td>Online First</td>
<td>Lets users access peer-reviewed articles before they are published in print. The article text is fully searchable and citable by Digital Object Identifiers (DOI), but available much more quickly, accelerating the circulation of critical discoveries.</td>
</tr>
<tr>
<td>Open Choice</td>
<td>Open Choice gives authors the option to make their articles open access, even when publishing in one of Springer’s highly respected subscription-based journals. Open Choice articles can be archived in institutional or funder repositories and can be made immediately accessible. Articles are published under the Creative Commons Attribution (CC BY) license and copyright remains with the author.</td>
</tr>

</table>

Purchasing and Licensing

SpringerLink is available to academic institutions, governments and corporations; and is purchased by everyone from small colleges on a single site to global organizations with multiple locations. Tailored licensing options are based on research intensity and the number of patrons.

Support

The Springer Nature worldwide help desks offer expert answers to technical or access questions any time via email at: onlineservice@springernature.com. Springer Account Development Specialists collaborate with customers to optimize usage of licensed electronic resources and provide post-purchase support. Find your dedicated Account Development Specialist and the available services at springer.com/@yourlibrary.

About Springer Nature

Springer Nature is the world’s largest academic book publisher, publisher of the world’s most influential journals and a pioneer in the field of open research. Our mission is to enable the advance of research and to help the research community to improve outcomes. Through our portfolio of journals we enable researchers, students, teachers and professionals to access the full depth and breadth of science, technology, medicine, social sciences and humanities.
**SpringerLink Content and Its Visitors**

**Who Are The Visitors?**

More than three quarters of all SpringerLink users are from academic institutions.

- **29%** Academic Researcher, Professor, Lecturer
- **28%** Student
- **21%** Ph.D. Candidate, Doctoral Student
- **7%** Researcher Government, Non-Profit
- **5%** Physician, Clinician
- **4%** Researcher, R&D Professional Industry
- **6%** Other

One quarter are from other research organizations, clinics/medical schools, and industry.

**Where Do They Come From?**

- **EUROPE** 35%
- **ASIA-PACIFIC** 29%
- **NORTH AMERICA** 24%
- **LATIN AMERICA** 5%
- **AFRICA** 2%
- **MIDDLE EAST** 5%

**Where Do They Start?**

- **Google Scholar** 33%
- **A&I Databases** 8%
- **Library Websites** 9%
- **Google Web Search** 30%
- **Other** 20%
