The Centre for Social and Environmental Research (CSEAR) is an international membership-based network that aims to mobilise accounting scholarship to enable a more sustainable society. CSEAR is a world-recognized community of scholars who engage with students, activists, practitioners, policy makers and other interested groups to generate and disseminate knowledge and build capacity on social and environmental accounting and accountability.

The CSEAR Italy conferences, which have been organized bi-annually since 2006, provide an interdisciplinary forum for encouraging and facilitating research and debate in social and environmental accounting and accountability.
